### MOTION PICTURES

The Motion Picture Service, Office of Information, U. S. Department of Agriculture, produces and distributes motion pictures on subjects with which the Department is concerned. They are both sound and silent and are released in 16-mm. and 35-mm. widths. Films in the 16-mm. size are available from State film libraries; 35-mm. films are available only from Motion Picture Service. They are lent to responsible agencies and persons or may be purchased outright. Prints of Department films may be obtained from 73 cooperating film libraries in the 48 States, and the Territories of Alaska, Hawaii, and Puerto Rico.

**RIVER RUN.** 2 reels, 16 mm., sound, color; also black and white. Running time, 15 minutes. Released 1951.

Too often, privately-owned forests have brought only transient prosperity to owners and communities alike because of poor forestry practices. This picture shows that proper management of forests can bring continuing prosperity over the years, benefiting owners, communities, and the Nation. Vividly portrayed is the once familiar log drive which has almost vanished from the American scene. Shows how the Machias River Watershed in Maine has been supplying timber continuously for almost 200 years, and how Machias River drives are still being made by the descendants of the river drivers of old. (Not in film libraries; available from regional offices of the Forest Service at San Francisco, Calif.; Denver, Colo.; Atlanta, Ga.; Missoula, Mont.; Albuquerque, N. Mex.; Portland, Ore.; Philadelphia, Pa.; Ogden, Utah; and Milwaukee, Wis. Not available for sale at the present time. TELEVISION USE PERMITTED.)
